HOW I WORK

Architecture and reuse

Maintainable components and patterns shared across products.

Hands-on leadership

Planning, mentoring and technical review while staying close to the code.

Product thinking

Defining flows, validating requirements and collaborating with business teams.

Delivery quality

Testing, accessibility, debugging and continuous improvement.

PROFILE

Frontend engineer specialising in React, Next.js and TypeScript. I combine hands-on development, architecture and team leadership to turn business needs into reliable, maintainable interfaces.

Alongside product work, I build multilingual platforms, privacy-conscious tools and a public React component library, with a focus on accessibility, user experience and code quality.

PROFESSIONAL EXPERIENCE

CaixaBank Tech

Dec 2023 – Present

Barcelona, Spain

Frontend Engineer / Squad Lead

Lead a frontend team working on corporate applications, contributing to technical decisions, architecture, planning and problem-solving while remaining hands-on.

- Build with React, TypeScript and Material UI / OpenFront, creating reusable components and integrating REST APIs.
- Coordinate architecture, planning, mentoring and code review with backend teams and stakeholders.

Appdrawn Solutions

Nov 2022 – Dec 2023

UK / Remote

Full Stack Developer / Product Owner

Developed and owned Airlinen, a services platform for short-term lets, taking the product end to end across backend, frontend, user flows and operations.

- Delivered features with Ruby on Rails, React and REST APIs across backend and frontend.
- Defined requirements and validated features with business stakeholders, coordinating priorities and delivery in a small team.

SIGMA

Jun 2018 – Jun 2019

Barcelona, Spain

Application Developer

Supported and developed university applications used by end users.

- Performed functional analysis, incident diagnosis and SQL queries to resolve application and data issues.

SELECTED PROJECTS

Next CV Builder

Bilingual wizard to create, customise and import/export CVs as JSON, with multiple templates and browser-local data. arrow-cv-builder.vercel.app

Mantenimientos AJ

Multilingual corporate website for fire protection, maintenance and low-voltage inspection services. mantenimientos-aj.vercel.app/es

Personal & Pilates

Multilingual platform for Pilates classes, bookings, users and content, with dedicated client and admin experiences. personal-and-pilates.vercel.app

Template Web Arrow

Accessible, multilingual and PWA-ready corporate foundation with centralised content and navigation for fast brand adaptation. arrow-template-web.vercel.app

Lidia Villanueva Bolívar

Editorial website presenting personalised Pilates and mindful movement. lidia-villanueva-bolivar.vercel.app

MUI Component Library · @jlopvil/mui-kit

Public React component library built on Material UI, with TypeScript contracts and a shared API across projects. npmjs.com/package/@jlopvil/mui-kit
